Mario Rafael Becerra Dueñas

Instructional Designer, Learning Experience Designer, E-Learning Developer

Email: mrbecerraduenias@gmail.com Phone: +90 505 941 22 68 LinkedIn: https://www.linkedin.com/in/mario-rafael-id-lxd/ Portfolio: https://mario.grasslms.online/ Work model: Remote (EU hours), open to relocation to Spain

Summary

Instructional designer with 10+ years in e-learning and learning experience design, now building the AI tooling that speeds up course production. Designed 50+ courses for B2B, B2C and K-12 audiences using ADDIE and 4C/ID. Built GrassLMS end to end as sole developer, a production learning management system running FastAPI, Next.js, PostgreSQL, Docker and Redis. Custom Python pipelines cut content production time by 60% at Algonova. English C1, Spanish B2, native Russian and Ukrainian.

Skills

Instructional Design: ADDIE, 4C/ID, JTBD, needs analysis, curriculum architecture, storyboarding, assessment design, learning objectives, scenario-based learning, microlearning, accessibility

Authoring and LMS: Articulate Storyline, Articulate Rise, Moodle, SCORM, xAPI, HeyGen, LMS administration, LMS migration, custom LMS platforms

AI and Automation: prompt engineering, structured JSON output contracts, LLM-assisted content production under schema guardrails, knowledge graph architecture, AI agent tooling (MCP servers), workflow automation

Development: Python, FastAPI, Next.js, TypeScript, PostgreSQL, Docker, Redis, Flask, HTML, CSS, JavaScript, REST API integration, Playwright automation

Design and Media: Figma, Photoshop, Illustrator, Premiere Pro, Camtasia, OBS, video production

Project Management: Notion, Jira, Trello, Miro, Confluence, Google Workspace, Slack, stakeholder management, SME collaboration

Professional Experience

Lead Learning Experience Designer and AI Engineer

Algonova (Algorithmics) 03/2025 - Present, Freelance and consulting

Dual role: lead learning experience design for the content team plus AI engineering for content production.

- Designed a 36-lesson computer literacy course from scratch for children ages 9 to 11, with original storyline, characters, interactive program simulators and quest-based progression
- Contributed to knowledge graph architecture for an AI-powered adaptive learning platform: skill taxonomies, prerequisite chains and diagnostic logic for personalised learning trajectories
- Built a prompt engineering system that lets instructional designers use LLMs for lesson plans, facilitator guidelines and collaboration-board generation
- Built a presentation generator (JSON input to branded template output) that cut deck creation from 2 hours to 15 minutes
- Built a Miro board creator and a FigJam workshop-board generator in Python, with brand config and a layout engine
- Built an LMS curriculum seeder in Python against a REST API that auto-deploys multi-module courses, generating lessons, exercises, quizzes and three review modes
- Built a video-lesson analysis pipeline of 25+ Python scripts: Whisper transcription, video frame extraction, Google Sheets and Drive aggregation, and pedagogical scoring reports across a 500MB dataset, used to

raise team-wide lesson quality
- Developed Playwright browser-automation scripts for bulk LMS content audits and automated UI demo capture
- Custom Python pipelines reduced content production time by 60%

L&D Specialist

Company name under NDA 05/2025 - 06/2026, Full-time

- Developed B2B e-learning content and learning and development programmes for corporate audiences
- Designed and ran internal training and coaching initiatives to onboard and upskill teams
- Partnered with stakeholders to align learning outcomes with business needs

Freelance and Independent Projects

2025 - 2026

- GrassLMS, Founder and Solo Developer: production learning management system built end to end with FastAPI, Next.js, PostgreSQL, Docker and Redis across 6 containers. 9 lesson types and 11 interactive exercise formats including a 37-language code editor, Desmos-integrated maths interactives, 2D robot programming puzzles and 3D exploration worlds. Full teacher tooling (course builder, gradebook, review queue, content library, analytics dashboard) and student experience (lesson player, auto-graded code sandbox, gamification, certificates, discussions). B2B subscription tiers with Stripe. Live at grasslms.online
- Beezo, E-Learning Experience Designer: solo-designed 4 multi-tier course lines covering cryptocurrency and NFT fundamentals, with video lessons, long-form articles and practical assignments, delivered on deadline as sole contributor
- BEAM Institute of Technology, Learning Experience Designer: built a Data Governance course from scratch with subject-matter experts from Billigence, running the full cycle from needs analysis and curriculum architecture through content development, video production and quality review
- Independent, AI Tools and Infrastructure Engineer: built 3 MCP servers enabling AI agent workflows (Google Workspace with 10 APIs and OAuth, Telegram via MTProto, Notion) and a Telegram data pipeline with Vision-OCR processing of 388 photos and categorisation of 700+ notes

Learning Experience Designer

Nebius Group (TripleTen) 01/2024 - 01/2025

- Localised 15+ B2B courses for the Latin American market, adapting content to cultural and professional context
- Created presentations and scripts for HeyGen AI avatar-based learning content
- Designed and implemented a cross-functional status tracking system that improved team visibility and reduced handoff delays
- Collaborated with subject-matter experts to update AI and programming course materials to current industry standards

Learning Experience Designer

Yandex Practicum 01/2022 - 01/2024

- Designed end-to-end curricula for Web Design, UX/UI and Graphic Design programmes aligned with industry hiring requirements
- Created instructional materials (tutorials, assignments, assessments) that pair visual and written explanations with hands-on practice
- Managed a cross-functional development pipeline coordinating designers, developers and reviewers for on-time course launches

Senior Instructional Designer

Foxford 11/2021 - 12/2022

- Led a team of instructional designers, running content audits and updating web design course lines
- Developed and automated a code evaluation system for Python courses, reducing manual grading effort by 40%

Learning Experience Designer and Team Lead

SIT Programming School 2018 - 2021

- Built educational programmes with structured multi-course progression paths that increased student lifetime value
- Formed and led a team of instructional designers producing B2B corporate training and B2C consumer courses
- Managed LMS operations and content deployment for international teacher training programmes

Senior Instructional Designer

Moscow Programming School 2018 - 2021

- Designed and audited course lines for programming and design programmes, and led learning experience design for new launches

Teaching Roles

AEFE, Lego Education Academy, RobolabKids 2016 - 2019

- Taught programming and robotics to school-age learners and designed the supporting course materials

Education

Master's Degree, Biomedical Engineering, RTU MIREA

Bachelor's Degree, Manufacturing Automation, RTU MIREA

UX/UI Designer Certificate, Yandex Practicum: competitor analysis, user scenarios, visual interface design, animated prototyping, user testing

Education as a Product, Universal University: problem identification, hypothesis generation, research-driven interactive system design

Certifications

Learning Experience Design: Development and Evaluation, Coursera

Learning Experience Design: Theories and Frameworks, Coursera

4C/ID Model

JTBD Framework

Game Design, Netology
